### *Storing Favorite Sites*

---

You can store multiple frequently viewed web sites as a bookmark (Netscape) or favorite (Internet Explorer). This feature creates a link from a menu within the browser that takes you to your stored web pages.

#### **Netscape**

To create a **Bookmark**:

1. Navigate to the web site you want to save
2. Click the "BOOKMARK" menu at the top of the page
3. Select "ADD BOOKMARK".
  - You have saved your page as a bookmark. When you want to view a saved bookmark, click the "BOOKMARK" menu at the top of the page and the link will appear towards the bottom. Select it and you will go to the page.

#### **Internet Explorer**

To create a **Favorite**:

1. Navigate to the web site you want to save
2. Click the "FAVORITES" menu at the top of the page
3. Select "ADD TO FAVORITES"
  - A dialog box will appear and ask you to give the site a name. Type an appropriate name and click the "OK" button. When you want to view a saved favorite, click the "FAVORITES" menu at the top of the page and the link will appear towards the bottom. Select it and you will go to the page.
